First aid kit should be made available at the bottom of the hill while a light first aid kit (Chun has one) should be made available towards the top for incidental cuts and bruises. Walkie talkies or cell phone numbers should be present as to stay within communications. Some additional water should be brought along per group as precaution and there will be 3 to 4 check points on the way up top manned by adult volunteers. There is no race heading down because of emphasis on safety. Kids and adults will be asked to bring their own sunscreen, hats, water and bagged lunch. Cost is minimal as to prizes for the kids (if any, not necessary though) and awards given to the winning team and engraving of the plaque. Any additional suggestion would be welcomed and valued. Thank you for your time in this matter.
